REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: JP 59-205424 teaches a method to obtain a high purity metal by fractional crystallization as shown in Figure 2. The molten metal is stirred by stirrers 10~ However, JP '424 does not disclose or suggest a series of compartments as claimed. Isenberg-O'Loughlin from "Metal Producing" teaches a tundish with a dam, weir, and Bubbling Brix, as shown in the Figure on page 22. However, Isenberg-O'Loughlin does not disclose or suggest using the tundish for a fractional crystallization method as claimed. JP '666 or Hall, from the previous office action, does not disclose or suggest a method of fractional crystallization in which a chamber with a lower wall and an upper wall and divided into a series of compartments communicating with each other as claimed in Claim 1. The prior art of record also does not disclose or suggest a method of fractional crystallization in which a layer of molten salt transporting liquid is present below and/or above a layer of metal to selectively transport the crystals, and the compartments in the layer of metal are formed by compartment walls extending towards and adjacent to the layer of transporting liquid transporting the crystals.

JP 55050442 teaches refining aluminum by adding Mn and Mg. JP 60234930 teaches reducing iron content of Al alloy by magnetic separation. There is no basis to suggest introducing the at most partially solidified molten metal into a chamber with a lower wall and an upper wall and divided into a series of compartments as claimed. Hanumanth et al and Bartel teach an electrical resistance probe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The information disclosure statement filed 4 April 2008 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because applicant indicated that the IDS filed 7 April 2008 was a replacement. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).
